DETAILED ACTION

Election/Restrictions

1. **Restriction is required** under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a method of producing a multimatrix.

Group II, claim(s) 5-7, drawn to a method for the simultaneous manufacture of a plurality of identical decorative articles of resin.

2. The inventions listed as Groups **I** and **II** do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature is old in the art as evidenced by Masuoin (JP 54160467A, PAJ Abstract, English translation) in view of Hakanson (US 1550160).

Masuoin discloses preparing a multimatrix of rubber having several identical figures, each of which reproduces in negative form the shape of a single ornament (abstract, English translation).

Masuoin does not disclose that the matrix is hardened rubber. However, Hakanson teaches that rubber molds are produced by forming a pattern in still plastic rubber and then hardening to fix the pattern (page 1 lines 59-72).

It would have been obvious to one of ordinary skill at the time of invention to harden the rubber in the mold of Masuoin as taught by Hakanson in order to fix the plurality of depressions therein.

It is noted that the numbers in parentheses in the claims are not given any patentable weight.
